I am Dr. Madiha Ali a clinician possessing comprehensive 12 years working experience in the Healthcare industry. I have a vast experience in Healthcare Management, with respect to working on healthcare projects, managing medical claims, healthcare provider interaction and closely analysing data related to the health industry.

I had been vigorously involved in planning and team management. I have also closely worked with the business development teams to set corporate targets keeping the current market trends. I have worked with clients from South East Asia, Europe, United States, and Middle East African region. I have modulated knowledge of the various parameters of each region and therefore stand out as a valuable resource in the healthcare industry. I have closely collaborated in updating the teams on Compliance and Regulatory updates as and when real-time basis.

I provide leadership and influence others and ability to resolve conflicts and/or negotiate with others to achieve positive results; establish and maintain effective interpersonal relations. I plan, organize, motivate, mentor, direct and evaluate the work of others, and meet deadlines and make informed decisions to develop solutions for complex problems.

I possess the knowledge of principles and methods of curriculum design, training delivery, and measurement of results along with that of local, state and federal regulatory requirements to ensure the highest quality care, provider and patient satisfaction, regulatory compliance, and patient safety.

In addition, I have advanced understanding of J&J or Industry IT's technology standards and strategies and partner with JHI Solution teams to create and shape solution strategies and roadmaps
